

DINESHNATH P. YOGI

Full-Stack Developer | Java | Spring Boot | Angular | Microservices | REST API | TypeScript

+91-7433055774 | dyogi4444@gmail.com | Ahmedabad, Gujarat, India | linkedin.com/in/dinesh-yogi | dineshyogi1232.github.io/portfolio

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 4+ years delivering scalable, enterprise-grade applications across SaaS, agriculture, catering, and healthcare domains. Expert in Java, Spring Boot, Angular 15, and REST APIs; experienced across the full SDLC in Agile/Scrum environments.

- Delivered production modules end-to-end at QDev Technolab, from architecture and development through deployment and live-issue resolution.
- Architected and launched a full-stack property rental SaaS (Dira2Stay/PropertyPro) including real-time WebSocket chat, CI/CD pipelines, and third-party OTA channel integration.
- Twice nominated Employee of the Month for outstanding code quality, problem-solving, and client-first delivery.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Backend: Spring Boot, Spring MVC, Hibernate, JPA, REST API, WebSocket, STOMP, Servlet, JSP, Microservices

Frontend: Angular 15, Tailwind CSS, Bootstrap 5, jQuery, ZK Framework (ZK-EE)

Databases: MySQL, PostgreSQL, MongoDB, Liquibase

Cloud & DevOps: Bitbucket Pipelines, CI/CD

Tools: Git, Postman, Jasper Reports, Swagger, DBeaver, SQLYog, SmartGit, Bitbucket

IDEs: Eclipse, Spring Tool Suite (STS), Visual Studio Code

Methodologies: Agile/Scrum, SDLC, OOP, MVC Architecture

WORK EXPERIENCE

Full Stack Engineer

Oct 2023 – Present

QDev Technolab Pvt. Ltd. — Ahmedabad, Gujarat, India

- Spearheaded full ownership of enterprise web application modules using Java, Spring Boot, Angular 15, ZK-EE, Hibernate, JPA, MySQL, and MongoDB, ensuring high availability and performance.
- Engineered the Lucas Menu Calculation Module from scratch — automating raw material computation, ingredient-level pricing, and party-order cost breakdowns, eliminating error-prone manual calculation workflows for catering operations.
- Designed and implemented the Crockery Management Module with dynamic person-range-based default allocation logic, streamlining order creation and reducing data-entry errors.
- Integrated Jasper Reports to automate generation of operational reports for client-facing dashboards, replacing manual report creation and improving turnaround time.
- Collaborated directly with clients to translate business requirements into technical specifications; delivered iterative releases following Agile/Scrum methodology.
- Enforced coding standards through peer code reviews, applied security patches, and maintained technical documentation across all delivered modules.
- Resolved live production incidents and provided continuous post-deployment support, consistently achieving high client satisfaction.

Junior Java Developer

Jul 2022 – Oct 2023

QDev Technolab Pvt. Ltd. — Ahmedabad, Gujarat, India

- Engineered Admin and Super Admin interfaces for Farmony — a multi-country farm-operations platform handling import/export workflows, online sales, equipment management, payroll, and configurable policy settings using Spring MVC, ZK-EE, and MySQL.
- Built the Wings Meetings Management Tool end-to-end: implemented agenda tracking, attendance records, automated email notifications to participants, and time-spent analytics (monthly/yearly/custom date range).
- Developed core modules of the Blood Management System — donor registration, real-time blood-inventory management, and donor-recipient coordination.
- Identified and resolved software defects; collaborated with senior developers on code reviews, unit testing, and production deployments.

Java Trainee

Feb 2022 – Jun 2022

QDev Technolab Pvt. Ltd. — Ahmedabad, Gujarat, India

- Built and tested web modules using Spring MVC, ZK-EE, and MySQL under senior developer mentorship, gaining hands-on enterprise Java development experience.
- Contributed to code documentation and application deployment processes, supporting smooth release cycles.

KEY PROJECTS

Dira2Stay / PropertyPro — Full-Stack Property Rental Management SaaS | propertypro.soft2develop.com

Technologies: Java 14, Spring Boot, REST API, MySQL, WebSocket, STOMP, Liquibase, Swagger, CI/CD, Bitbucket Pipelines

- Problem: Vacation rental operators lacked a unified platform for listings, bookings, guest messaging, and OTA distribution. Built a full-stack SaaS solution covering property listings, booking workflows, and real-time messaging from the ground up.
- Engineered a bidirectional real-time chat system using WebSocket and STOMP, enabling instant guest-host messaging without page reloads.
- Integrated third-party Channel Manager (Channex) for OTA distribution with async Spring Boot sync services, scheduled retry jobs, Liquibase DB migrations, and a live channel-sync status dashboard.
- Implemented automated CI/CD pipelines via Bitbucket Pipelines across dev, staging, and production environments, achieving zero-downtime deployments.

Jucas Catering Software | myjucas.com

Technologies: Spring Boot, Spring MVC, Hibernate, JPA, MySQL, Jasper Reports, Angular 15, REST API

- Problem: Enterprise catering businesses relied on manual calculation of raw materials, pricing, and crockery allocation per order. Built a full-stack automation platform eliminating these manual workflows.
- Developed Menu Calculation Module from scratch: automated raw material requirements, ingredient-level pricing, and party-order cost breakdowns per event.
- Built Crockery Management Module with dynamic person-range allocation applied automatically during order creation, reducing data-entry overhead.
- Integrated Jasper Reports for automated operational reporting, replacing manual report generation for client dashboards.

Farmony — Admin and Super Admin | dev2.farmony.org

Technologies: Java, Spring MVC, ZK-EE, MySQL

- Problem: A multi-country agricultural operation needed a unified admin system for managing imports, exports, sales, payroll, and configurable policies. Engineered both Admin and Super Admin interfaces covering core workflows and sub-admin management.
- Delivered dynamic policy configuration capabilities in the Super Admin interface, enabling non-technical administrators to manage system-wide settings without developer intervention.

Wings — Meetings Management Tool

Technologies: Spring Boot, Angular 15, MySQL, REST API

- Problem: Meeting management was unstructured with no central tracking for agendas, attendance, or time utilisation. Built an enterprise tool for scheduling, agenda management, attendance tracking, and document storage.
- Automated email dispatch of agendas and timings to participants; built time-spent dashboards with monthly, yearly, and custom date-range analytics.

Blood Management System

Technologies: Java, Spring MVC, MySQL, Hibernate

- Problem: Donation centres lacked a real-time system for tracking blood inventory and coordinating donor-recipient matching. Developed a healthcare application managing donor registration, real-time inventory tracking, and coordination workflows.

EDUCATION

Master of Computer Applications (MCA)

Jul 2020 – Jul 2022

Gujarat Technological University (GTU), Ahmedabad, Gujarat

Bachelor of Computer Applications (BCA)

Jul 2017 – Jul 2020

Gujarat University, Ahmedabad, Gujarat

HONORS & AWARDS

- Employee of the Month Nominee (x2) — QDev Technolab Pvt. Ltd.: Recognised twice for exceptional problem-solving, strong code quality, and a client-first approach to software delivery.
